DESIGN INNOVATION

EASY TO CONTROL

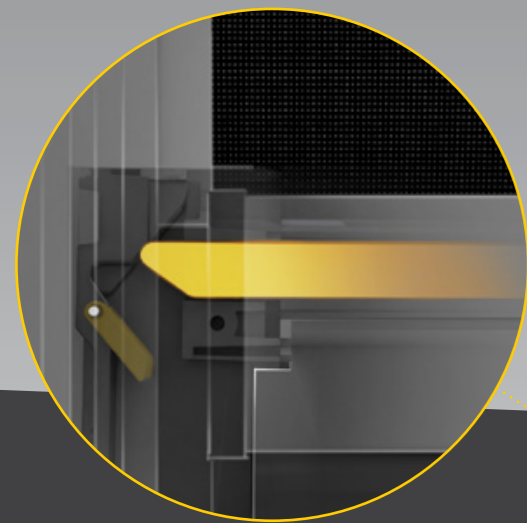

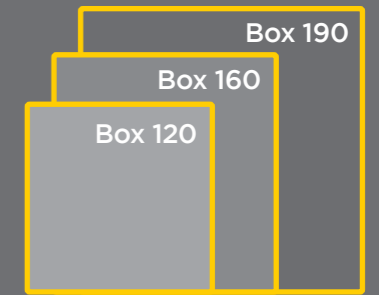

The Zipscreen difference

Zipscreen is Australian designed and manufactured and features the latest in technological innovation - ensuring the finest outdoor shade solution.

Your custom designed blinds can be made in widths up to 7 metres with a 5m drop, offering you an external solution to fit almost any area.

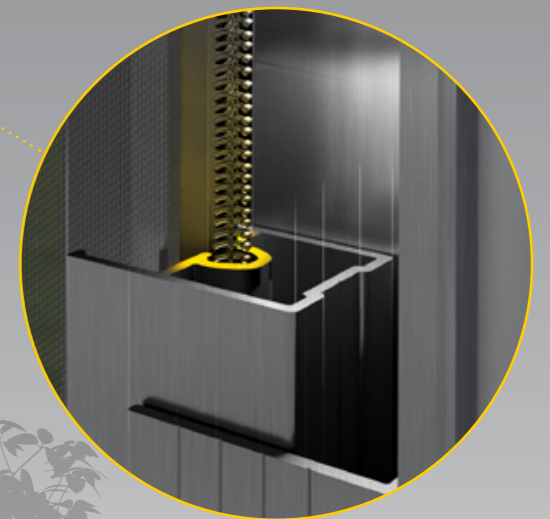

Customised headbox configuration

Zipscreen's headboxes are manufactured from high quality aluminum featuring a square, modern profile. From the sleek and compact Box 120 to the adaptable Box 160 and the robust Box 190, each option is engineered for consistent aesthetics and seamless integration.

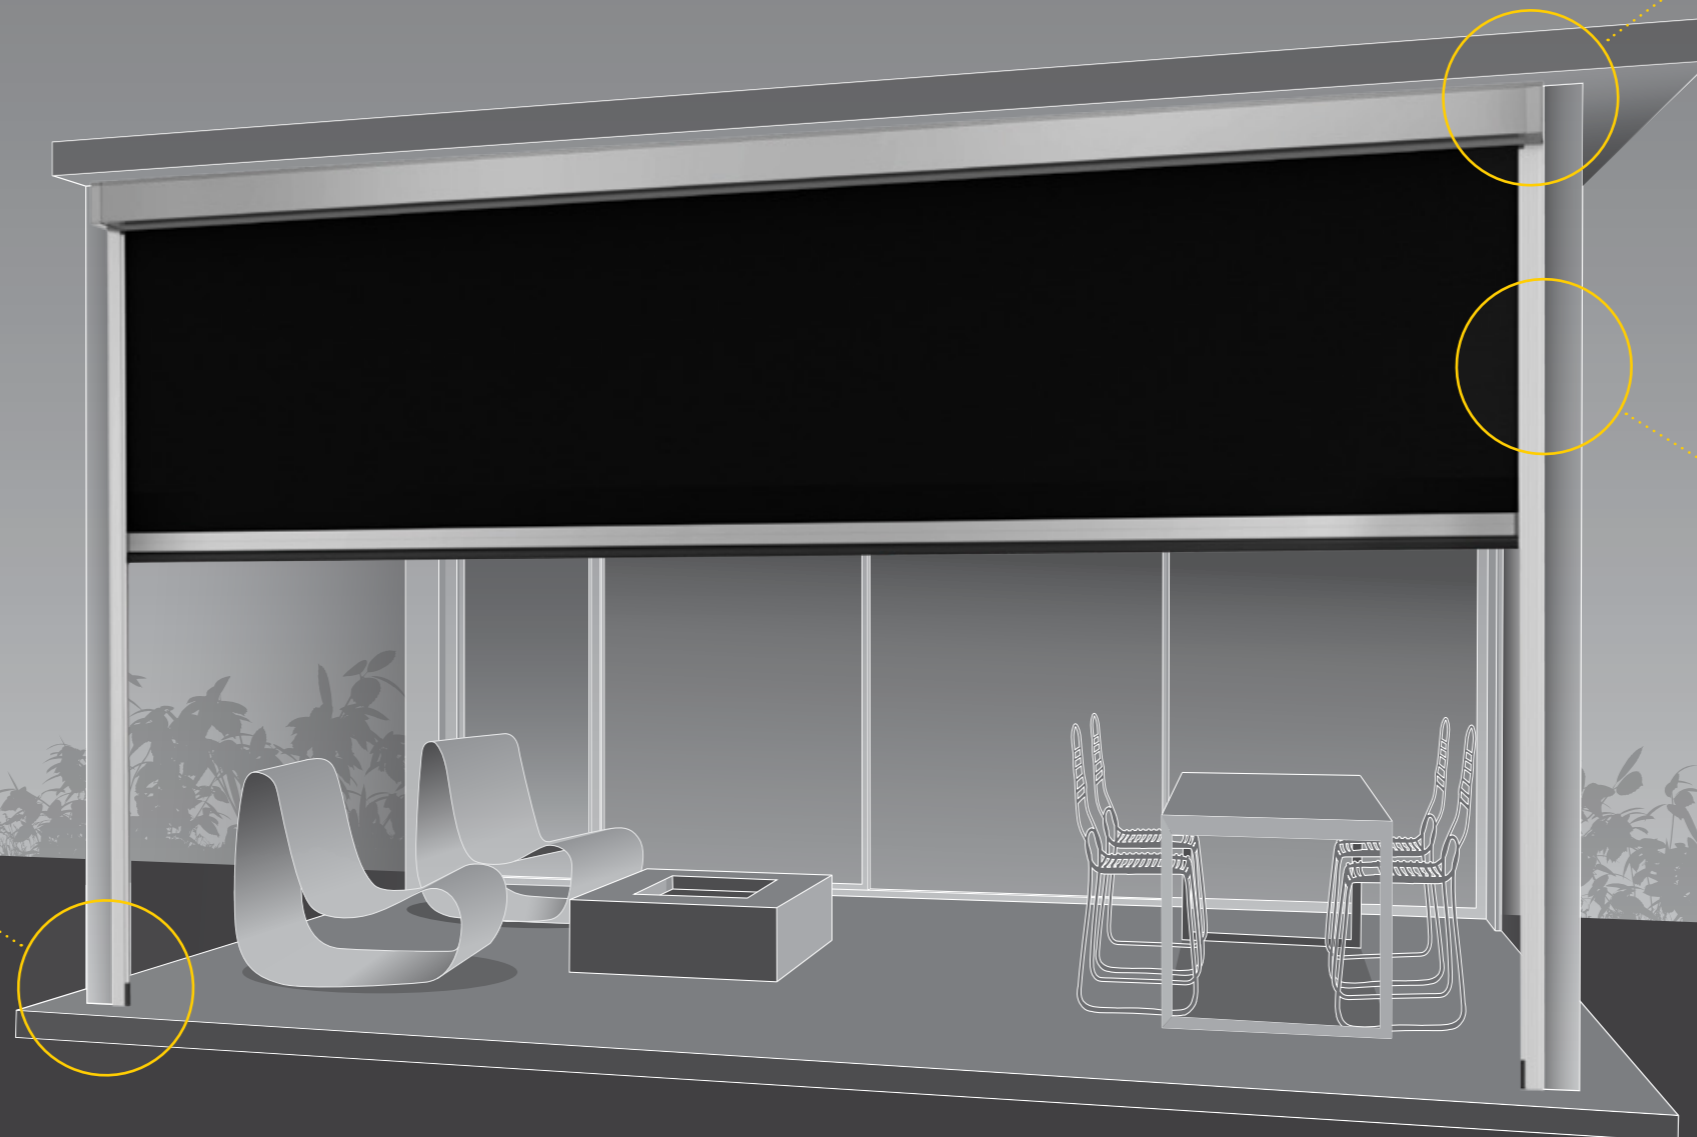

One action Ultra-Lock

Exclusive to Zipscreen, the patented Ultra-Lock is a hidden locking mechanism that integrates into the side channel of the system. The result? A secure and tensioned blind with an ultra-smooth taut fabric finish.

Hidden fabric retention

Concealed within the channels, z-LOCK™ securely fastens the fabric in position creating a strong, streamlined finish. With precision integration, the zip-guided system ensures zero gaps between the fabric and channel while ensuring an effortless operation.

Zipscreen control options

“Hey Siri...
open my shades”

Manual

Control your Zipscreen manually, using either a cost-effective spring or crank solution. Simply open or close by hand using the weight bar or by winding the detachable crank handle.

Motorised

Power your Zipscreen using a wired or battery powered motor. Enjoy effortless and convenient operation with the simple touch of a button or handsfree voice control.
